Fall is upon us, and winter is swiftly approaching. It is the *perfect* time of year to take care of any pot holes in your parking lot!

Asphalt deficiencies that have already developed in your parking lots will continue to deteriorate during the rain of the fall season. And, with winter coming, pot holes will only grow larger with the snow and plow trucks driving over them.

Infrared Asphalt Repairs will permanently repair your pot holes in your parking lot!

Infrared repairs provide a seamless, waterproof repair to many different types of asphalt issues.

Capitol Sweeping's Infrared Asphalt equipment.

Infrared Asphalt Repairs can also be performed during the winter months, even when it is severely cold. Should you

have a new pot hole develop during the winter season, do not hesitate to contact us to provide a permanent repair!

Capitol Sweeping Services, Inc. is available to provide estimates for any pot hole and asphalt repairs in your parking lot. If you would like a demonstration of our new technology, call us today!
